

TiVo® Premiere XL4

4 tuners. 2 terabytes. Unlimited entertainment.

Imagine a set-top box so sophisticated it combines digital cable channels and the world's most advanced DVR with the best entertainment from the web—from content partners like Netflix, Pandora® and Hulu Plus™. Now imagine that it also delivers the ability to record four shows at once while watching a fifth, and the capacity to record an industry-leading 300 hours of HD programming. Introducing the cable- and broadband-connected TiVo Premiere XL4 DVR, the ideal entertainment distribution component for any custom installation.

Product overview:

- 4 tuners allow you to record up to 4 shows at once
- 2 terabytes of recording capacity provide up to 300 hours of HD programming
- Easy access to broadband entertainment providers like Netflix, Pandora, Hulu Plus, Amazon and YouTube™*
- Streams music and photos from any home network and the web*
- Full 1080p and 1080i support
- World's only THX-certified DVR for optimal sound and video fidelity
- Free TiVo® App for iPad®, iPhone® and Android provides a richer TV experience
- eSATA port supports increased storage via compatible hard drive
- Compatible with digital cable and Verizon FiOS®
- Stream or share recorded content between TiVo Premiere DVRs
- Integrates with Crestron, Control4, RTI and other popular control systems
- Supports HDMI compliant splitters with up to 16 HDMI ports
- MoCA® support (including MoCA bridge)
- Superb source for HT upgrades and future expansion

What you'll need:

- Subscription to the TiVo service via a broadband, Ethernet or MoCA connection
- Digital cable TV or Verizon FiOS® connection (does not support satellite, AT&T U-verse, antenna or analog cable)
- One multistream CableCARD™ decoder from cable company (required to receive digital cable channels, additional fee may apply)**

*Broadband Internet connection required. Due to restrictions placed by copyright holders, certain premium programming cannot be transferred to computers or mobile devices. TiVo Desktop Plus software (sold separately) is required to transfer recordings to mobile devices.

**CableCARD™ Decoder. A CableCARD decoder is required for your TiVo Premiere XL4 DVR to receive any cable programming. The TiVo Premiere XL4 is designed for use only with digital cable systems. It does not receive analog programming, including over-the-air, and will not work with an over-the-air antenna. Most of the largest cable providers have "digital simulcast," which means they rebroadcast all their analog channel programming on digital channels as well. This means that all or most of the programs available on analog channels are also available on digital channels when a CableCARD is inserted. Therefore, if your provider has "digital simulcast" and rebroadcasts all of its programming in analog you will not miss any of your cable channel programming with a TiVo Premiere XL4. If you are unsure whether your cable operator's service provides digital simulcast of all analog programming, please contact your provider to determine whether it offers all-digital or digital simulcast service. If you plan to relocate to a new area or change your video service provider, please contact your new provider to determine whether it offers all-digital or digital simulcast service for all of its analog programming.

Certain advanced and interactive digital cable services such as video-on-demand, a cable operator's enhanced program guide and data-enhanced television services may require the use of a set-top box. For more information call your cable operator.
